

Haneen Behery

Software Developer | Front-End (Angular) & iOS (SwiftUI)

Riyadh, Saudi Arabia

(+966) 550200305 | Haneen.behery2@gmail.com | www.linkedin.com/in/haneen-behery-3106b8211

PROFESSIONAL SUMMARY

Software Developer with 4+ years of experience building scalable web applications and iOS products. Strong background in Front-End development using Angular and modern web technologies, with hands-on experience delivering production iOS apps using **SwiftUI**. Worked on **ERP systems**, **government platforms**, and consumer-facing mobile apps, with a strong focus on clean architecture, user experience, and reliable **API integration**.

TECHNICAL SKILLS

- **Languages:** Java, Python, C#, TypeScript, PHP, SQL, HTML, CSS, JavaScript.
- **Backend Frameworks:** REST APIs
- **Frontend Frameworks:** Angular, Bootstrap, Responsive Design, Tailwind.
- **IOS:** Swift, SwiftUI, Xcode, MVVM, Core Data
- **Database:** PostgreSQL, MySQL, Firebase, Mongo DB, Indexing & Query Optimization.
- **Concepts:** Microservices Architecture, OOP, SOLID Principles, Design Patterns, System Design, Algorithms, Agile/Scrum.

PROFESSIONAL EXPERIENCE

Meter Company | Riyadh, Saudi Arabia — Front End Developer | October 2025 – Present

I worked on building core modules for an ERP system where the main challenge was avoiding repetition and keeping the system scalable as it grew. To solve that, I focused on creating reusable shared components (like tables, forms, and UI elements) that were used across multiple modules. This significantly reduced duplication and made it faster to deliver new features. I also designed dynamic reactive forms with proper validation, making complex data entry more manageable and consistent across the system. On the integration side, I handled API communication for CRUD operations, including proper error handling, loading states to improve user experience and role-based access control. One of the most interesting parts was building an accounting module from scratch, which required me to quickly understand financial workflows and translate them into a working system. Overall, I contributed to delivering multiple ERP modules within a short timeframe while maintaining code quality and consistency across the project.

Role Projects:

Meter ERP System, Website, Meter Web, Website ([link](#)).

UniTech Company | Riyadh, Saudi Arabia — Full Stack Developer | Oct 2024 – Feb 2026

Developed responsive Angular web applications using TypeScript, RxJS, and Angular Material. Converted Figma designs into pixel-perfect UI components with accessibility standards.

Integrated REST APIs, handled validation, loading states, and error feedback. Collaborated with cross-functional teams in Agile sprints

Role Projects:

Blueberry Web and iOS , Website ([link](#)), MediStore Web, Website ([link](#)).

King Abdulaziz Foundation for Research and Archives - Future Tech, | Riyadh, Saudi Arabia — Front End Developer - UI/UX Designer | Oct 2023 – Oct 2024

I contributed to delivering a complete government platform within just one month, which required both speed and precision. I built a responsive Angular UI using a modular architecture and reusable components, ensuring consistency and maintainability across the platform. One of my main tasks was converting Figma designs into pixel-perfect components while adhering to accessibility standards, making the platform usable for a wide range of users. I integrated the front-end with REST APIs, handled authentication, and implemented reactive forms with validation, dynamic fields. Also, I actively participated in QA by testing features, identifying bugs, and improving performance, ensuring a smooth and reliable user experience.

Role Projects:

Darah Web, Website ([link](#))

Neomers Agency | Riyadh, Saudi Arabia — Web Developer, Technical Account Specialist | Sep 2022 – Sep 2023

Acted as a technical point of contact between clients and development teams, translating business requirements into web and UI/UX solutions. Contributed to the development and customization of web interfaces using HTML, CSS, and JavaScript. Supported project delivery by coordinating requirements, timelines, and technical feedback across teams.

Role Projects:

Neomers Website, Website ([link](#)), Mgasha , Website ([link](#)).

Yeger Tech | Dubai — Front End Developer, UI/UX Designer (Summer Intern) | Jun 2022 – Sep 2023

Assisted in UI/UX design using Figma and Agile workflow. Converted designs into responsive front-end pages (HTML, CSS, JS). Worked on a white-label GameFactions system and rewards loyalty platform, contributing to UX design and front-end implementation for a seamless user experience.

Gulf Casting Agency | Riyadh, Saudi Arabia — Full Stack Developer | Jan 2022 – Jun 2022

Developed and maintained a web platform for casting registration using PHP, JavaScript, HTML, CSS, and SQL. Created and managed database schemas and queries for applicant tracking.

EDUCATION

B.S. in Information Technology and Computing | 2018 – 2022 Arab Open University | Saudi, Riyadh

Graduation Project: An **Arduino** powered, IOT smart box that helps elderly patients remember their medication. The project also consisted of an **Android application** to setup the medication schedule and alerts.

Apple Developer Academy Programs (The Academy and The Second Year) | 2022 – 2024 Apple | Saudi, Riyadh

Projects:

- **Raheb, Ios App**

Raheb is an app that uses positive psychology to help people focus on the positive side of their life by tracking their mood and providing them with 3 things to do based on their mood: Affirmations, tasks, and journaling.

- **Klaket, IOS App and Web**

Klaket is an app that links actors and directors together by providing an endless cast view and roles. The cast can audition for the role online and the director can choose the cast online.

- **Convert It, Ios App**

We were asked to create an app that doesn't need internet access including Arabic, English, and accessibility features. So, My teammate and I developed an app that can convert units and currencies in an easy and fast way.

- **Gourmet, IOS App**

Gourmet is an app that allows users to order a private chef for their special events. It also helps chefs who are looking for a freelance job to create their own portfolio.

Tatematy, IOS App (2022)

Tatematy is an application that helps parents by converting the vaccination book into an app that can remind the parents when it's time to take the next vaccine. It also helps them check the availability of the vaccination in the nearest hospitals.

COMPETITION AND VOLUNTEER ENGAGEMENT

Public speaking | 2019 Google | Saudi, Riyadh.

Saudi Hackathon ChatGPT | 2023 *Tuwaiq* | Saudi, Riyadh

Developed an **AI-integrated** tourism app that helps travelers plan personalized schedules based on their moods, interests, and preferences. The app was recognized as **one of the top 20 projects in the hackathon**.

LANGUAGES & PERSONAL

- **Languages:** Arabic (Mother Tongue), English (Excellent), Turkish (Basic).
